### EXAMINER'S AMENDMENT

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:

### CLAIMS

- Please cancel Claims 31 and 32.

### *Election/Restrictions*

3. **Claims 1 and 4 – 30** are allowable. The restriction requirement between Species I – III, as set forth in the Office action mailed on June 30, 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim. Claims 11 – 13, 15 – 21 and 27 – 29**, directed to a non-elected species are no longer withdrawn from consideration because the claims requires all the limitations of an allowable claim. However, **Claims 31 and 32**, also directed to a non-elected species (without traverse) remain withdrawn from consideration because these claims do not require all the limitations of an allowable claim.
4. In view of the above noted withdrawal of the restriction requirement, Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or

includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
6. This application is in condition for allowance except for the presence of **Claims 31 and 32**. Accordingly, **Claims 31 and 32** have been cancelled.

*Allowable Subject Matter*

7. **Claims 1 and 4 – 30 (now respectively renumbered 1 – 28)** are allowed.
8. The following is an Examiner's statement of reasons for allowance:

The closest prior art discloses a method for capturing an image, which includes a plurality of objects. Each of the plurality of objects is a corresponding distance from the imaging device. The image is associated with a focus zone such that the method determines if the image matches at least one criterion and determining whether at least one of the plurality of objects is out of focus if the image matches the at least one criterion and further shifting the focus zone so that the at least one object is out of focus if at least one of the plurality of subjects is not out of focus.

However, the closest prior art does not teach or fairly suggest an image processing apparatus, comprising: an image data input unit for inputting image data of a plurality of objects including a main subject, said image data input unit comprises a means for inputting a parallaxic

image, which is generated by capturing said plurality of objects viewed from a plurality of different perspectives; a depth distribution information receiving unit for receiving a depth distribution information calculated from said parallax image; said depth distribution information is included in said image data and indicates a distance to each of said plurality of objects from the image data input unit; a range setting unit for restricting a searching range in the depth direction for searching for said main subject from said plurality of objects using the input image data; a partial image extracting unit for extracting, as a partial image, at least a portion of one of said plurality of objects from said image data based on said depth distribution information, a depth direction of said partial image being restricted to said searching range set by said range setting unit; and a main subject detecting unit for receiving main subject information and detecting whether said partial image is said main subject based on said main subject information, wherein in searching for said main subject from the plurality of objects, said partial image extracting unit extracts first, as the partial image, at least the portion of said one of said plurality of objects that is closest in distance in the depth direction

9. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
